Regulatory Compliance	
View	Certificate of Conformance:

- Ideal for a Variety of Ultraviolet (UV) Imaging Applications
- 200nm Designed Wavelength
- Phosphor Coated Camera Sensor
- Includes Camera, Cable, and Easy-to-Use Software
- [NIR](#) Versions Available

CamUV 200nm UV USB 3.1 Cameras are designed with phosphor-based scintillators, allowing the camera to image in the ultraviolet (UV) at wavelengths as low as 200nm. This compact 27 x 27 x 14.5mm CS-mount camera offers a resolution of 1440 x 1080 pixels and a pixel size of 3.45 μ m, allowing this camera to ensure sharp, high-resolution imaging for even the most detailed applications. CamUV 200nm UV USB 3.1 Cameras ship with the camera, a cable, software on a USB drive, and a quick start guide to facilitate setup. These cameras are an ideal solution for a variety of applications, including UV laser beam profiling, machine vision, general UV detection, and product quality monitoring.
