## Product Details

CS-Mount lenses are not compatible with C-Mount cameras.

- Low Distortion and Day/Night Options
- Focal Lengths from 4.4mm - 90mm
- C-Mount Versions

Megapixel Varifocal Lenses are the ideal choice when you need a specific field of view that corresponds to a non-standard focal length. They make system integration straightforward while allowing for fine tuning, and also create the flexibility so the lenses can be integrated across multiple applications. Day/Night varifocal lenses are the perfect choice when you need to extend your imaging system into the NIR without sacrificing visible imaging. Megapixel Varifocal Lenses have C-Mount versions. The lenses feature focal lengths from 4.4 to 90mm.
