Product Downloads

General

Type:

Narrow Bandpass Filter

Physical & Mechanical Properties

Clear Aperture CA (mm):

19.50

Outer Diameter (mm):

25.40

Construction:

Mounted in Black Anodized Ring

Substrate Thickness (mm):

1.00

Optical Properties

Full Width-Half Max FWHM (nm):

55.00 +/- 10

Minimum Transmission (%):

≥85

Coating:

AR Hard Coated

Color:

Green

Surface Quality:

40-20

Transmission Wavelength (nm):

525 - 550

Threading & Mounting

Filter Thread:

C-Mount

Mount Thickness (mm):

3.00

Regulatory Compliance

RoHS 2015:

Compliant

Certificate of Conformance:

View

Reach 242:

Compliant

Product Details

- Threads Directly between a Lens and any C-Mount Camera
- Narrow UV, VIS and SWIR Bandpass Filters Available
- Recommended for Wide Angle Lenses
- UV Protective Windows Available

C-Mount Camera Imaging Filters feature narrow imaging bandpass filters, covering the UV, VIS, and SWIR spectral ranges and are designed with anti-reflection coatings to minimize light loss and enhance performance. These filters are designed to thread directly into any C-mount camera, between the lens and sensor, to ensure compatibility across devices and are particularly useful in applications with space constraints or lenses without filter threads. A custom installation wrench is included with each filter. C-Mount Camera Imaging Filters achieve high transmission rates, typically exceeding 85%, while maintaining a narrow bandwidth, allowing them to selectively transmit a specific wavelength range. These imaging filters are ideal for applications where precise wavelength selection is crucial for optimal imaging and detection such as; Food & Agricultural Inspection, Densitometry, Remote Sensing, and Security and Surveillance.

Note: UV Protective Windows offering low absorption and excellent thermal stability are available for imaging applications between 350 – 1100nm.
