Product Details

- Includes an Air Blower, Tweezers, and Finger Cots
- Items Included in Convenient Storage Bag
- Ideal for Proper Optics Handling and Cleaning

Optics Care Kits provide essential basic tools for proper handling and care of optics. The finger cots can be used to prevent contamination of the optical surface and are ideal for handling larger optics. The two tweezers are ideal for manipulating smaller optical components, less than 25mm. The air blower can be used for non-contact cleaning to prevent scratches while cleaning. Optics Care Kits include an air blower, tweezers, and finger cots and come in a convenient storage bag. Additional cleaning tools such as lens tissues, swabs, gloves, and suction tools can be found on our website [here](#).
