Product Details

- Locks Post Height Without Removing Post
- Allows Basic Post Rotation
- For Our 0.5" (12.7mm) Diameter English and Metric Posts
- Aluminum Collar

TECHSPEC® Post Collars feature an aluminum collar and allow for basic post rotation. Once the collar is locked to the post at the top of the post holder, the post can be rotated within the post holder without re-adjusting height. Since the collar can be attached without removing the post, it is also great for quickly moving mounts in/out of the optical path at the same height position. TECHSPEC® Post Collars have a locking thumbscrew included. They are designed for use with Edmund Optics' [English](#) and [Metric](#) Stainless Steel Mounting Posts.
